

# **DON'T FEED THE GEESE KEEP WILDLIFE WILD**

**Please give our wildlife plenty of space to roam around their home. Many people enjoy feeding waterfowl, but the effects of this seemingly generous act can be harmful.**

Help conserve wildlife and their natural habitats. Feeding geese, ducks and wild animals can cause the following harmful effects:

- Overcrowding
- Poor nutrition
- Spread of disease
- Unnatural behaviour
- Delayed migration
- Safety Concerns
- Dependency on humans
- Pollution
